Technical Skills

- **Web Technologies:** HTML5, CSS3, SASS, Bootstrap3, JavaScript, AJAX, jQuery, JSON, React, Redux, Node.js, GitHub.
- **Frameworks:** React JS
- **Methodologies:** Agile, UML Water fall
- **Programming Languages:** C#, PHP, Java
- **Databases:** MYSQL

Key Projects

Cody online book store

- Online shopping book store by PHP and MySQL

EXAMIA

- An online examination full stack system Using stacks: HTML, CSS03, bootstrap, javascript, PHP , MySQL.
- Key features: The admin is responsible for adding and editing subjects and professors and make an approval for exams for the professors. Professors prepare for their subjects' exams with adding, editing questions, identifying the correct answer, set timing and choose the level of difficulty for exam. Students take the exam with different random questions and options and the results and ranking are stored to be shown for the student and professor.

MyReads

- A React js project made with react hooks and backend API.
- A bookshelf app to classify books to three classes: read, want to read and currently reading.

Myflix.com

- A clone version of Netflix with React js and TMDB API.
- New features: responsive search bar and a carousel

WouldYouRather game

- This is a web app using React-Redux that lets a user play the "Would You Rather?" game. The game goes like this: A user is asked a question in the form: "Would you rather [option A] or [option B] ?". Answering "neither" or "both" is against the rules.

Diary

- A react-hooks notes app
- Key features: Dark mode, Dropdown menu, Upload image, add tags and edit notes.

Internships

- Web development Intern, IEEE
- Advanced web track FWD, Udacity
- Frontend web development, ITI
